## **Harmonia is Certified as a Qualified HUBZone Business**

We are proud to announce that Harmonia Holdings Group, LLC received approval as a HUBZone (Historically Underutilized Business Zone) certified company by the Small Business Association. As one of only a few qualified HUBZone companies focused on software development, we are pleased to be among the first to demonstrate our commitment to our customers as well as our community. Firms meeting specific employment criteria may be designated as HUBZone firms, which assist the Federal government in ensuring federal contracting and employment opportunities are available in underutilized and underemployed regions.

Harmonia's new HUBZone designation means Federal program managers, contracting officers, and contracting specialists will have an easy avenue to allow Harmonia to deliver our services, assisting Federal agencies in meeting small business contracting goals. Harmonia has successfully completed projects for the Navy, Army, Air Force, DARPA, Dept of Transportation, Dept of Energy and National Institutes of Health.
