## **Harmonia's Pallabi Saboo Named Among Top Washington Female CEO's**

**Blacksburg, VA** – Pallabi Saboo, CEO of Harmonia, Inc., has been named among the 25 top female executives in the region by *Washington SmartCEO* magazine. *SmartCEO's* annual Bravo! Business Achievement Awards honors women who have successfully grown their business while remaining active in their communities and displaying leadership within the workplace and beyond. Saboo was recognized at an awards ceremony at the Crowne Plaza in Old Town Alexandria, Virginia on July 10, 2008.

According to *SmartCEO* magazine the following characteristics define a Bravo! winner:

- Overcoming business obstacles
- Financially outperforming competitors
- Displaying leadership and a strong work ethic within and beyond the workplace
- Using her business to help benefit the community through acts of philanthropy
- Doing something unique in the business world and having an inspiring story to tell

"I am deeply honored to have been selected as a recipient of *SmartCEO's* Bravo! Business Achievement Award and to have been included among such an impressive group of awardees." commented Saboo. "This award reflects on the entire Harmonia Team – who are dedicated to providing cutting edge technology to support the most cost effective development of a wide range of Federal, DoD, and commercial applications in the shortest time possible."

Harmonia is dedicated to the development of cutting edge technologies that will significantly improve the way applications are developed and deployed for complex, sophisticated software systems. Harmonia brings skills in the areas of legacy code modernization and exposure of services for service-oriented architecture, visualization and human-computer interface, automation of training development, simulation modeling, collaborative system design, automated battlefield management aids, and automation of software quality assessment, with tools that are platform independent and future-proofed.

### **Benefits of Harmonia's Technology**

- 20+% reduction in software development costs
- 25% reduction in errors from inconsistencies in engineering artifacts
- \$2M+ reduction in cost per version of a tactical HCI
- Ensure what is designed is what is delivered
- Shorten time to market
- Reduce Government's Total Ownership Cost by reducing maintenance & migration costs

## About Harmonia

Harmonia, Inc. is a woman-owned, small disadvantaged business founded in 1999 with offices in McLean and Blacksburg, VA. It is creating a suite of cradle-to-grave software process improvement tools that dovetail with popular products from IBM, Microsoft, TeleLogic, BEA, and more:

**LiquidApps®** is a graphical application creation environment. With LiquidApps®, analysts can quickly identify portions of legacy systems to extract or expose as web services to reuse, then use those components or create new ones to build applications if required. Examples of these artifacts can be requirements or use cases. Once the application is designed, LiquidApps has tools to quickly build documentation and training materials along with code generators to generate the actual working application for whatever platform is needed. During the code generation process all code is delivered to the MDA with no proprietary libraries or runtime engines needed for deployment. The code can be modified or extended as desired.

The capabilities in LiquidApps® are possible due to Harmonia's expertise in model-driven architecture and XML meta-languages. By using model-driven architecture, LiquidApps automates many of the processes needed to build, test, and document applications. This automation not only saves time but also ensures synchronization and quality.

**uReuse™** is an innovative technology developed by Harmonia to allow developers to intelligently migrate legacy code to modern code bases. Unlike traditional 'black box' code converters, uReuse™ utilizes a novel approach to enable developers to understand the code they are reusing. uReuse™ is fully extensible to several code bases, including Ada, C/C++ and Java, and is based on the Eclipse development platform.

**Harmonia Federal** is a technology firm providing high value information technology consulting, system design and integration solutions, along with government technology consulting. We join together with our clients and strategic partners to apply technology insight, leading-edge technologies and solutions that deliver value through efficient management of assets, employees and customers. Harmonia provides its customers with a spectrum of software and information technology solutions.

---

Harmonia currently has several SBIRs within the DoD. **It also has a 5 year, \$25M IDIQ** from NAVAIR. Contracting vehicles include: Seaport-e, Alliant GSA, DESP II and WARFIGHTER Focus. Harmonia's client base includes: AFRL, MDA, DARPA, NAVAIR, NSWC, NUWC, Northrop Grumman, Raytheon, DOE, SAIC, Schneider Electric, BEKO, Digital Sandbox, Inc.
